

I need technology that can keep up with my non-stop Ferrari adrenaline.

Proud to be the Official Sponsor

and Technology Partner of Scuderia Ferrari.

AMD—driving Scuderia Ferrari to victory.

When every nanosecond counts, there's one thing the Scuderia Ferrari team wants to do: go faster. Victory depends on having precise information about the car, engine performance, what lies ahead, and the other drivers. Since 2002, AMD has provided Scuderia Ferrari with technology solutions to succeed in a highly competitive environment. By providing innovative solutions, AMD helps the team achieve optimal performance and ultimate success.

Sponsor

Scuderia Ferrari

AMD is the Official Sponsor and Technology Partner of Scuderia Ferrari.

From start to finish, AMD is there.

AMD is part of Scuderia Ferrari's success.

Computation of Fluid Dynamics

Wind tunnels. Weather conditions. Aerodynamics. All of these affect racecar performance. Scuderia Ferrari uses AMD 64-bit technology to discover the aerodynamic characteristics and wind tunnel fundamentals of its racecars—and to develop winning responses.

Car Engine

Ferrari engineers constantly refine their designs, relying on AMD Opteron™ processors to shorten development time and perform complex engine simulations. As technology evolves, so does AMD—with innovations that keep Scuderia Ferrari at the head of the pack.

Telemetry Analysis

During a race, a Formula One racecar engine generates an enormous amount of electronic data. Ferrari relies on AMD Opteron™ processors to collect the data and send it to the pits for immediate analysis—faster, better, and more thoroughly than ever before.

Giving the Prancing Horse the edge

To continue its dominance of Formula One racing in 2004, Ferrari plans to expand the use of AMD products, including solutions based on AMD64 technology. Michael Schumacher, Ferrari driver and six-time defending World Champion, sums it up neatly: “What we love about AMD is that they, like Ferrari, have a passion for performance, an aggressive spirit of competitiveness and a determined commitment to be the best. AMD64 technology is a testament to those qualities, and it's AMD64 technology that helps to give Ferrari its competitive edge.”
