---

## **Trademarks**

AMD, the AMD Arrow logo, AMD AllDay, AMD Virtualization, AMD-V, PowerPlay, Vari-Bright, and combinations thereof are trademarks of Advanced Micro Devices, Inc. Other product names used in this publication are for identification purposes only and may be trademarks of their respective companies.

Dolby is a trademark of Dolby Laboratories.

HDMI is a trademark of HDMI Licensing, LLC.

HyperTransport is a licensed trademark of the HyperTransport Technology Consortium.

Microsoft, Windows, Windows Vista, and DirectX are registered trademarks of Microsoft Corporation in the US and/or other countries.

MMX is a trademark of Intel Corporation.

OpenCL is a trademark of Apple Inc. used by permission by Khronos.

PCIe is a registered trademark of PCI-Special Interest Group (PCI-SIG).

USB Type-C® and USB-C® are registered trademarks of USB Implementers Forum.

Reverse engineering or disassembly is prohibited.

USE OF THIS PRODUCT IN ANY MANNER THAT COMPLIES WITH THE MPEG ACTUAL OR DE FACTO VIDEO AND/OR AUDIO STANDARDS IS EXPRESSLY PROHIBITED WITHOUT ALL NECESSARY LICENSES UNDER APPLICABLE PATENTS. SUCH LICENSES MAY BE ACQUIRED FROM VARIOUS THIRD PARTIES INCLUDING, BUT NOT LIMITED TO, IN THE MPEG PATENT PORTFOLIO, WHICH LICENSE IS AVAILABLE FROM MPEG LA, L.L.C., 6312 S. FIDDLERS GREEN CIRCLE, SUITE 400E, GREENWOOD VILLAGE, COLORADO 80111.

## New Features/Enhancements

---

- Based on LLVM 16.0.3 release (llvm.org, 3<sup>rd</sup> May 2023)
- fPIC and fPIE options made default
- Default optimization level is -O2
- Compliance to C++17 standards by default
- Tuned for [AOCL-LibM \(AMD Math Library\) 4.1](#)
- Bit reproducibility support improved for C/C++ and Fortran compilation
- General improvements targeting compile time reduction
- New option in AOCC Optimization Report (AOR) tool to display the AOR.

***Note:** As -fPIC and -fPIE options are default with AOCC 4.1, it will generate location independent code by default. Static libraries that are statically linked and not using -fPIC options so far must be rebuilt with AOCC 4.1 with these default options. Else, it could display a linker error. Alternatively, use the options -fno-PIC/-fno-PIE with AOCC 4.1 to disable generating location independent code.*

---

## Bug Fixes

---

This release includes fixes to the following critical and known issues:

- Bug in Fortran 'call system'
- Debuggability errors for OpenMP outlined functions
- Using Fortran NULL intrinsic with MOLD argument
- Bug in Fortran to C transfer of string data
- Downgraded -Implicit-int and related errors to warning
- Floating point conversion from quadruple value to double precision
- Fortran compiler crash with -Hqq
- Fortran issue on procedure pointer definition
- Using BIND(C) Fortran attribute
- Using NOALIAS on Fortran allocation routines
- Issues with AOCC pre-requisite checks
- AOCC library path detection for OpenMP library
- AOCC Dwarf compatibility issues with GDB
- Debuggability issue with Fortran namelist
- Fortran allocatable variables with COPYIN clause
- Fortran allocatable component defined in a module
- Fortran NEAREST intrinsic when used inside an array
- Fortran issues with preprocessing specific string patterns
- Support to suppress Fortran IEEE warnings using environment variable AOCC\_SUPPRESS\_IEEE\_WARNINGS
- Error generated for separate module procedure in Fortran when scalar dummy has value attribute
